

Helpful tips to prepare for your professional photos:

1. Stick to solids and subtle patterns. Bold stripes, large designs and polka dots stand out and tend to draw attention away for the subject (your face/expression).
2. Dress in timeless clothing. Let your age, rather than the clothes you wear, date the portrait. $\frac{3}{4}$ or full length tops are best.
3. Wear colors that translate well through photography. Dark colors like navy blue and earth tones look especially nice outdoors. Bright shades of yellow, orange and pink can alter skin tones and are not ideal for portraits. Avoid wearing white as the main color of your top. White tends to wash peoples' faces.
4. Hair and makeup should be styled like you would on a day-to-day basis.
5. Clean and iron all clothing for your session. Always bring a backup outfit, in case of a spill or mishap.
